Search Tips and Examples

- Within search boxes:**
- Use & for AND (gold & copper)
 - Use / for OR (gold / copper)
 - Use ! for NOT (gold ! copper)
- Special Characters:**
- Use * to truncate (e.g. deposit* finds deposit, deposits, deposition, etc.)
 - Use >, <, >=, <= for greater or less than (e.g. <= 1999 finds dates earlier than 1999 inclusive)
 - Use : to search a range (e.g. 1999:2003)
- NTS Area Queries:**
- If you are seeking information on a **specific part** of an NTS area, please do the following:
- In the "NTS Area" query box, enter the NTS area followed by the specific section you are interested in (for example: entering "63K13" into the query box would yield all results from the NTS area of 63K13 **only** and would not include results regarding 63K as a whole)
 - This will allow the search function to yield more accurate and pertinent results to suit your research needs.
- Toggle buttons:**
- Use between criteria to limit the search (AND, OR, NOT)
